Education

University of Houston, Houston, TX
Bachelor of Science, Computer Science

May 2026

Relevant Skills

Languages: JavaScript, TypeScript, C#, Python, Java, HTML, CSS, C++, SQL | Bilingual (English, Spanish)

Frameworks / Libraries: React, Angular, Node.js, Express.js, ASP.NET Core, Tailwind CSS, Tensorflow/Keras

Database and Cloud: SQL Server, Azure SQL, MySQL, PostgreSQL, Azure, Docker, MongoDB

Testing & DevOps: Jest, Vitest, Git, CI/CD (GitHub Actions, Jenkins), Postman, Linux

Productivity Tools: Microsoft Office Suite (Excel, Word, PowerPoint, Outlook)

Projects

Company Sponsored Senior Development Project

January 2026 - May 2026

- Developed an enterprise integration application for a company's business internal workflow in a 7 person agile team using TypeScript, React, Tailwind, Node.js/Express.js and MSSQL for the company that sponsored the project
- Provisioned and deployed Azure SQL database, including server setup and schema design
- Wrote unit tests using Vitest to ensure reliable software before delivery to the client
- Communicated directly with company representatives to gather and clarify project requirements, ensuring team deliverables aligned with business expectations
- Oversaw all merges and conflict resolutions to ensure codebase stability and code quality across the collaborative team

Property Management System - Personal Family Use

March 2026 - Present

- Built a full-stack web application to streamline operations for a family-owned rental business
- Designed RESTful APIs using ASP.NET Core, JWT tokens for multi-user access, and relational database with SQL Server
- Built a responsive Angular frontend UI for tenant management, lease tracking, maintenance requests, and improving administrative efficiency with real time reporting
- Consolidated previously paper-based and spreadsheet-driven property operations into a single full-stack platform

Zoo Web Application

February 2025 - April 2025

- Developed a full stack web application with a 4 person team simulating zoo operations
- Implemented role-based access control, management dashboards, and visitor portal with JWT authentication using JavaScript, React, Tailwind, Express.js, MySQL, and Microsoft Azure for hosting
- Collaborated on database schema design and optimization for managing animals, enclosures, attractions, employees, visitors, and revenue data
- Built REST API endpoints for CRUD operations on enclosures, attractions, and employee data

Employment History

Family Property Manager

September 2022 - Present

- Managed tenant screening process, reviewed applications, conducted background checks, and compiled a shortlist of qualified candidates with recommendations presented to the landlord for final approval
- Coordinated mobile home relocations and installations while maintaining compliance with ordinances and municipal codes

Valmont Industries Inc.

April 2024 - August 2024

Quality Control Technician

- Inspected structural integrity of 45–140ft concrete poles at every production stage, serving as final authority on ambiguous requirements and blueprint compliance
- Identified and flagged non-conforming materials before use in production, preventing defective output from advancing through the manufacturing process
- Performed standardized quality tests on concrete mixtures to verify compliance with industry specifications and structural requirements
- Logged detailed inspection records and prepared blueprint references for incoming shifts

Achievements

3rd Place - UH Fall 2025 AI and Data Science Showcase

December 2025

- Developed a Dual-Pipeline Lung Cancer Detection System in a team of 3 using python and tensorflow with multiple datasets.
